1 Summary

We inform you about a critical security vulnerability in a software component used by the Vector Licensing in Vector License Client and in Vector Tools to manage licenses and to use them in Vector tools. Please note that all Windows systems are potentially affected by this security vulnerability.

Vendor: WIBU-Systems AG

Component: CodeMeter Runtime for Windows

Reported Vulnerabilities: WIBU has reported a Denial of Service (DoS) Vulnerability in all CodeMeter Versions earlier than CodeMeter 7.30a. The vulnerability is identified as CVE-2021-41057.

A detailed description of the vulnerabilities can be found on WIBU-Homepage:

<https://www.wibu.com/de/support/security-advisories.html>

2 Resolution for this Issue

The vulnerability is resolved in CodeMeter 7.30a or higher.

Vector has verified CodeMeter 7.30a, for compatibility with Vector License Client. We found no compatibility issues.

Hence, we strongly recommend an immediate update to CodeMeter 7.30a on all systems used as network license server for Vector Products.

You can download the latest CodeMeter from WIBU-Systems' homepage:

[Download runtime software for Wibu-Systems products - CodeMeter, WibuKey: Wibu-Systems](#)
